

POW #7 – Pizza Party

Due: Monday, April 1st, 2019 at the start of class

Ms. Hoff wants to throw a pizza party for all of her students. She decides to cover the cost of the party by recycling aluminum cans. How many aluminum cans would need to be recycled so that there could be a pizza party? Justify your response with research and a complete write up explaining your values.

Your write up should be neatly handwritten or typed on a separate paper.

Restate the problem in your own words, explain how you solved it and **be sure to cite any sources you used for gathering information.**
